## Footway Maintenance on Woodgate Way & The Close, Docking

Essential pavement reconstruction works along Woodgate Way and The Close in Docking are scheduled to begin on **Tuesday 7 April 2026**. The works are expected to take **approximately 13 weeks**, weather permitting. These improvements will involve removing the existing damaged surface and replacing it with a new asphalt finish and along with replacement of any damaged kerbs.

The work will be carried out under a road closure and to help minimise disruption, access to properties will be maintained during the works, however there may be some restrictions to vehicle access to individual properties as work takes place in front of driveways. Residents are encouraged to liaise with the team on site if they have any questions or concerns.

Please note that the parking area at Woodgate Way, will be closed and used as a works compound during footway repairs. Parking will not be available during this time. We apologise for any inconvenience.

Norfolk County Council thanks residents for their patience and cooperation while these important pavement improvements are undertaken.

This scheme represents an investment of **£187,100** and will be delivered by **Norfolk County Council's Infrastructure Department** and its contractors.
